

# New Telescopic Pole w/ 4 mm Banana Jack. *Dedicated to the electrical diagnostic in industrial facilities.*

P / N PeTeT.

Our new telescopic pole meets the need of the technicians who make electrical diagnostic in industrial facilities. Despite its light weight and its small size when retracted our pole reaches high ceilings and apart walls. The elaborate design of its tip eases the electrical contact with sockets and metal frames. Despite its length, our pole is well balanced so it is less wearing to use it. Its handle has a 4 mm banana socket which complies with shrouded or not 4 mm banana plugs.

## Protection.

1000 V CATIII  
reinforced insulation  
pollution degree 2.

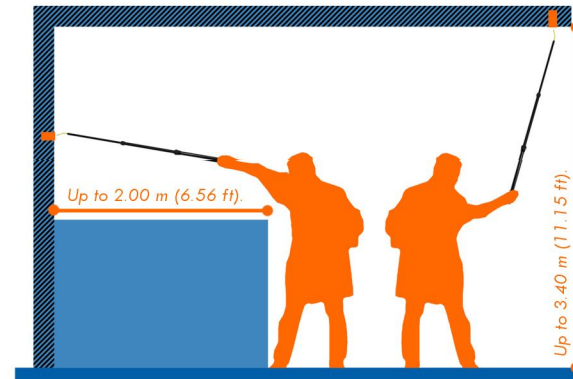

## User Protection Level

(more information on the page "I.A.Q." of our website.)

The three segment telescopic feature multiplies by 2.3 the retracted length. It offers the right size to put it in a trunk or in a case and the right size to check high points.

Thanks to the balancing and the length of our pole, high ceilings and apart walls are easily reached.

The particular design of our tip offers safety, sturdiness, and ease in the everyday work. Moreover the tip is removable for maintenance and evolution.

## Sleeve.

To avoid short circuits.

## Steel.

For good sturdiness.

## Edge.

To catch and hold on edges.

Yellow color and 30° angled.

To keep the tip in sight.

## Sharp and hard tip.

To scrape paints or polish.

## Cap.

To avoid injuries.
