A QUESTION OF QUALITY

Not all aluminium cases are the same. The quality aluminium cases in the Hofbauer range are easily recognised by their frame construction. The cases are special because the frames, made from solid aluminium profiles, fit around the case in one continuous unbroken piece, ensuring super stability and perfect closing.

Since 1902, the name Hofbauer has stood for quality cases and top class service and our many years as a partner in industry has given us the experience to provide case solutions for every requirement.

These quality aluminium cases continue our customer orientated company philosophy. Choose from a wide range of styles and sizes in the standard case range or ask about a custom made case, tailored to your individual needs. All are available with professional finishing, inside and out, and a comprehensive range of accessories.

ISO 9001

Hofbauer has the most current DIN EN ISO 9001:2000 certification. Working to the highest quality levels, all our case ranges are regularly tested for strength and durability.

Hinges

Sturdy steel lid stay hinges, chromed and galvanised, function perfectly even after years of use.

Quality Construction

A reliable frame construction is all important for a strong and sturdy case that closes perfectly, even after years of constant use. This is achieved by fixing solid aluminium profiles to the case in one continuous unbroken piece. For added strength, the case body and frame are secured with extra strong rivets.

The case walls are made from hard aluminium sheets, pressed and glued, on a part or the whole surface of strong plywood or MDF board. The profiles are anodised to prevent possible discolouration or colour loss.

Foam sets

Cut your own design in foam sets consisting of layers of flat foam in various thicknesses for the case base, plus profile foam for the lid. Fit with double sided tape, spray, contact or hot glue.

Choose from:

Soft PU foam: a cost-effective material that cushions and is shock absorbing

Hard PE foam: an attractive and resilient material, that holds products tightly.

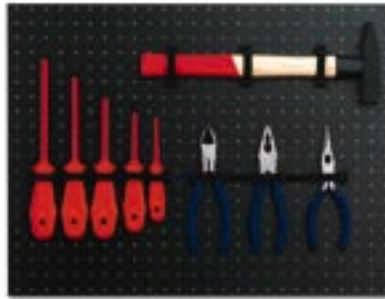

Or we can create the foam interior for you, to your design and colour requirements, to fit your products perfectly.

Base Divider System

Robust plastic adjustable slot-in dividers for a flexible organisation of the case interior. 5mm grid.

Tool panel

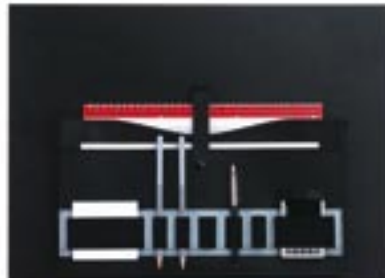

Design your own layout, using the elastic tape & retaining rivets, on both sides of the panel.

Printing and Labels

Promote your cases professionally, in an individual design, with a scratch resilient print or label in a size and colour of your choice.

Document files

In leather-look material, with 2 or 3 document pockets and elastic loops. Or enquire about a custom made file.

Shoulder Strap

A removable and adjustable shoulder strap makes for easier handling.

Trolley

A removable trolley, with an integrated telescopic handle, can be fitted on most aluminium cases.

ALU-BASIC

The basic answer for every day use

- ▶ Hard aluminium surface bonded on 3mm thick MDF board
- ▶ Easy care interior, resilient and easy to wipe clean
- ▶ Lockable with solid, chromed, steel toggle catches
- ▶ Comfortable, stylish fold down handle
- ▶ Able to carry loads of up to 10 kg
- ▶ Hinge with an opening angle of 90°
- ▶ **Special options available:**
 - ▶ Changes to the size and colour
 - ▶ Customised screen printing or labelling
 - ▶ Individual Interiors

ALU-UNI

Compact, practical, attractive: the Allrounder

- ▶ Hard aluminium surface bonded on 4mm thick MDF board
- ▶ Easy care interior, resilient and easy to wipe clean
- ▶ Lockable with solid, chromed, steel toggle catches
- ▶ Comfortable, stylish fold down handle
- ▶ Able to carry loads of up to 15 kg
- ▶ Sturdy lid stay hinges for a 90° opening angle on Alu-Uni 100 and 300 or 180° on Alu-Uni 200
- ▶ Riveted feet on the hinge wall ensure stability. Alu-Uni 200 has additional feet on the case base
- ▶ For extra strength, the frame is riveted to the case walls, lid and base
- ▶ **Special options available:**
 - ▶ Changes to the size and colour
 - ▶ Customised screen printing or labelling
 - ▶ Individual Interiors

ALU-STRONG

The extra strong Alucase – for a multitude of uses

- ▶ Hard aluminium surface pressed and glued, over the whole surface, on 5mm thick plywood
- ▶ Easy care interior, resilient and easy to wipe clean
- ▶ Lockable with solid, chromed, steel toggle catches
- ▶ Comfortable, stylish fold down handle
- ▶ Able to carry loads of up to 20 kg
- ▶ Sturdy lid stay hinges for a 90° opening angle
- ▶ For extra strength, the frame is riveted, pressed and glued to the case walls, lid and base
- ▶ Double riveted feet on the hinge wall ensure stability
- ▶ Silicone „O“ ring seal protects against hazards, foreign bodies, dust and water as per IP54
- ▶ **Special options available:**
 - ▶ Changes to the size and colour
 - ▶ Customised screen printing or labelling
 - ▶ Individual Interiors

ALU-TRANSIT

Extremely robust and an expert in transportation

- ▶ Black coated abrasion resistant aluminium surface pressed and glued, over the whole surface, on 8mm thick plywood
- ▶ Interior lined with hard PE foam
- ▶ Lockable with recessed butterfly latches and integrated eyelets for seals or padlocks
- ▶ 2 recessed, glass fibre reinforced plastic handles
- ▶ Able to carry loads of up to 30 kg
- ▶ Sturdy lid stay hinges for a 90° opening angle
- ▶ Extra strong frame with integrated reinforced corners. Riveted, pressed and glued to the case walls, lid and base
- ▶ Riveted metal corners with integrated feet ensure stability and resilience
- ▶ Silicone „O“ ring seal protects against hazards, foreign bodies, dust and water as per IP55
- ▶ Easy transport on partly recessed ball-bearing hard-wearing wheels
- ▶ **Special options available:**
 - ▶ Changes to the size and colour
 - ▶ Customised screen printing or labelling
 - ▶ Individual Interiors
